With over 150 million sold to date globally, Clymer is a recognized repair manual brand customers return to again and again. They are the ultimate DIY guide books for all powersport vehicles. As one of the most widely read repair books in the world, these manuals span the powersport industry. Clymer Manuals are available in both print and online editions under the Haynes and Clymer brands, and there is an extensive selection of repair books, written in both English and Spanish. Every manual is written from thorough hands on experience based on a complete teardown, which is the stepbystep procedure for dismantling a vehicle or piece of equipment partbypart. This is followed by the detailed rebuilding of the machine. Manual information is presented in a style that any DIYer can follow, even a beginner. Writing each manual takes 30 weeks, with authors working as teams to shorten the production time and to avoid fatigue during the difficult process. Hundreds of photographs accompany the stepbystep instructions. He wrote two more special builders manuals while doing his National Service in the RAF. The first Haynes Manual for the Austin Healey Frogeye Sprite was published in 1965. Based on the teardown and rebuild of that project vehicle and with extensive use of stepbystep photographs—a process that has not changed to this day—this manual set the standard for many generations to follow. This simple but important philosophy differentiates them from other repair manual companies. With over 50 years of experience in this market sector, they have deeply embedded processes, builtin expertise, and proceduredriven efficiencies which help give Haynes its unique identity.
